Personal Statement

I am a Software Engineer with a background in Chemical Engineering, who is passionate about problem-solving and continuous learning. With over 5 years of experience in different industries, I can easily adapt to new challenges and new ways of working.

For the last year, I have been actively working to improve my technical skills to migrate to a more backend-focused role, having developed skills in multiple languages such as Python, Java and Typescript.

In addition, an extensive mentorship program with As Raparigas do Código gave me valuable insights to the professional world of tech and provided me with all the necessary algorithmic bases to apply to everyday challenges. On top of that, it helped me develop key skills such as version control through Git, as well as several essential concepts, like observability, CI/CD paths and even good code practices.

Work Experience

 **Data Analyst**
Prio Energy, S.A | Hybrid

08/2023 – Present

- Designed and implemented automation solutions to optimize business processes.
- Developed custom digital tools to support data-driven decision-making.
- Managed projects end-to-end, from requirements analysis to deployment.

Key Projects:

- Designed and deployed a Cloudflare-hosted web platform [[Distansys](#)] to calculate logistics distances, achieving 80% faster task execution and 30% cost reduction for the company.
- Developed an internal management application using Microsoft Power Apps, adopted by ~40 coworkers, resulting in a 40% optimization of the business cycle negotiation.
- Developed a stock management platform for scratch-card inventory across multiple warehouses, using Appsmith, Docker and SQL, enabling automated order processing with real-time stock deduction and centralized inventory visibility, estimated to reduce manual stock management effort by over 40%.
- Developed a Python-based business plan simulator, estimated to reduce manual analysis time by over 50% and improve decision-making efficiency.

Tech Stack: Python, JavaScript, Power Automate, Power Apps, Appsmith, Typescript, Docker, Power BI, Git, Cloudflare Pages.

Quality Assurance Support
Bonera Group | On-site

05/2022 – 06/2023

- Managed the Integrated Management System (ISO 9001:2015) ensuring legal and environmental compliance.
- Coordinated audits, complaint handling, and maintenance planning.

Core Skills: Process Optimization, Problem Solving, Documentation & Reporting, Audit Coordination.

Junior Process Engineer
A4F – Algafuel, S.A | On-site

06/2020 – 05/2022

- Led process optimization and monitoring to improve operational efficiency.
- Supported R&D activities and managed stock and supplier relations.

Core Skills: Process Optimization, R&D Support, Project Coordination, Problem Solving, Data Monitoring.

Backend Automation Test

04/2026 – 05/2026

Mindera Code Academy

Practical Skills: Backend test automation with Postman, Newman and Playwright; API testing and validation; JavaScript/TypeScript; authentication flows; test architecture; data validation; CI pipeline integration; software quality best practices.

Java Language Fundamentals

11/2025 – 12/2025

EISnt - Formação e Consultoria

Tech Skills: JavaScript (ECMAScript), focusing on DOM manipulation, event handling, forms, animations, and library usage.

Mentorship Programme

01/2025 – 10/2025

As Raparigas do Código

Practical Skills: Functional programming, OOP, Sorting algorithms (bubble, insertion, quick), binary trees, parallelism and concurrency, graphs, recursion, linked lists.

Soft Skills: Team collaboration, managing deliverables with strict deadlines, choosing between code readability and simplicity.

Mentor: [Teresa Alves | LinkedIn](#)

Scripts Programming

04/2025 – 05/2025

EISnt - Formação e Consultoria

Tech Skills: JavaScript (ECMAScript), focusing on DOM manipulation, event handling, forms, animations, and library usage.

Associate Reactive Developer (O11)

11/2024 – 12/2024

OutSystems Developer School d'As Raparigas do Código

Tech Skills: OutSystems Reactive Developer O11, covering reactive web application development, data modeling, business logic implementation, UI design, and integrations – sponsored by “As Raparigas do Código”.

Git&GitHub

06/2024 – 07/2024

As Raparigas do Código

Tech Skills: Git & GitHub, focusing on version control, branching, merging, collaboration workflows, CI/CD workflows, conflicts resolution.

Advanced Python

11/2022 – 12/2022

EISnt - Formação e Consultoria

Expertise: Python fundamentals: setting up development environments, scripting, data handling (CSV, SQL, XLS, text), control flow, functions and classes, use of libraries (Pandas, NumPy, Matplotlib).

Integrated MSc in Chemical Engineering

10/2013 – 11/2018

Universidade de Aveiro, Aveiro (Portugal)

Master Thesis: [Development of aqueous \(micellar\) two phase systems to continuously purify macroalgae compounds](#)

Personal Skills

Languages: Portuguese – Native speaker | English – Professional Proficiency

Programming Languages: Python, Java, TypeScript, JavaScript
